

ICC

INTELLIGENT CRIMPING CONTROL

The only control in the world specifically designed for crimping machines. This ensures the best accuracy and repeatability in the market. New innovative automatic correction function removes the need for machine calibration.

ICC is very robust and high resistant for physical impact and vibration. IP66 compatibility guarantees operations in high humidity and extreme temperatures.

7" resistant touch screen and icon based graphical user interface enables fast and easy usage.

ICC comes with more advanced Recipe and Job Queue management. Favourites and color coded recipes make usage easy.

ICC enables individual user management with different level user rights.

ICC control is Industry 4.0 compatible.

CONNECTIVITY

Ethernet (TCP/IP, UDP/IP & FTP)
 USB
 CAN bus
 A3 signal

OPTIONS

Pressure crimping ICC1
 Step crimping ICC2
 Quality control ICC3
 Graphical quality control ICC4
 Interface pack ETH (Communication TCP/IP & UDP)
 Bar Code Reader BCR

ICC IS AVAILABLE FOR THESE MACHINES

FP-series
 SP-series
 NC-series
 CC-series
 KC-series
 EF-series
